Kelio

WHAT'S NEW

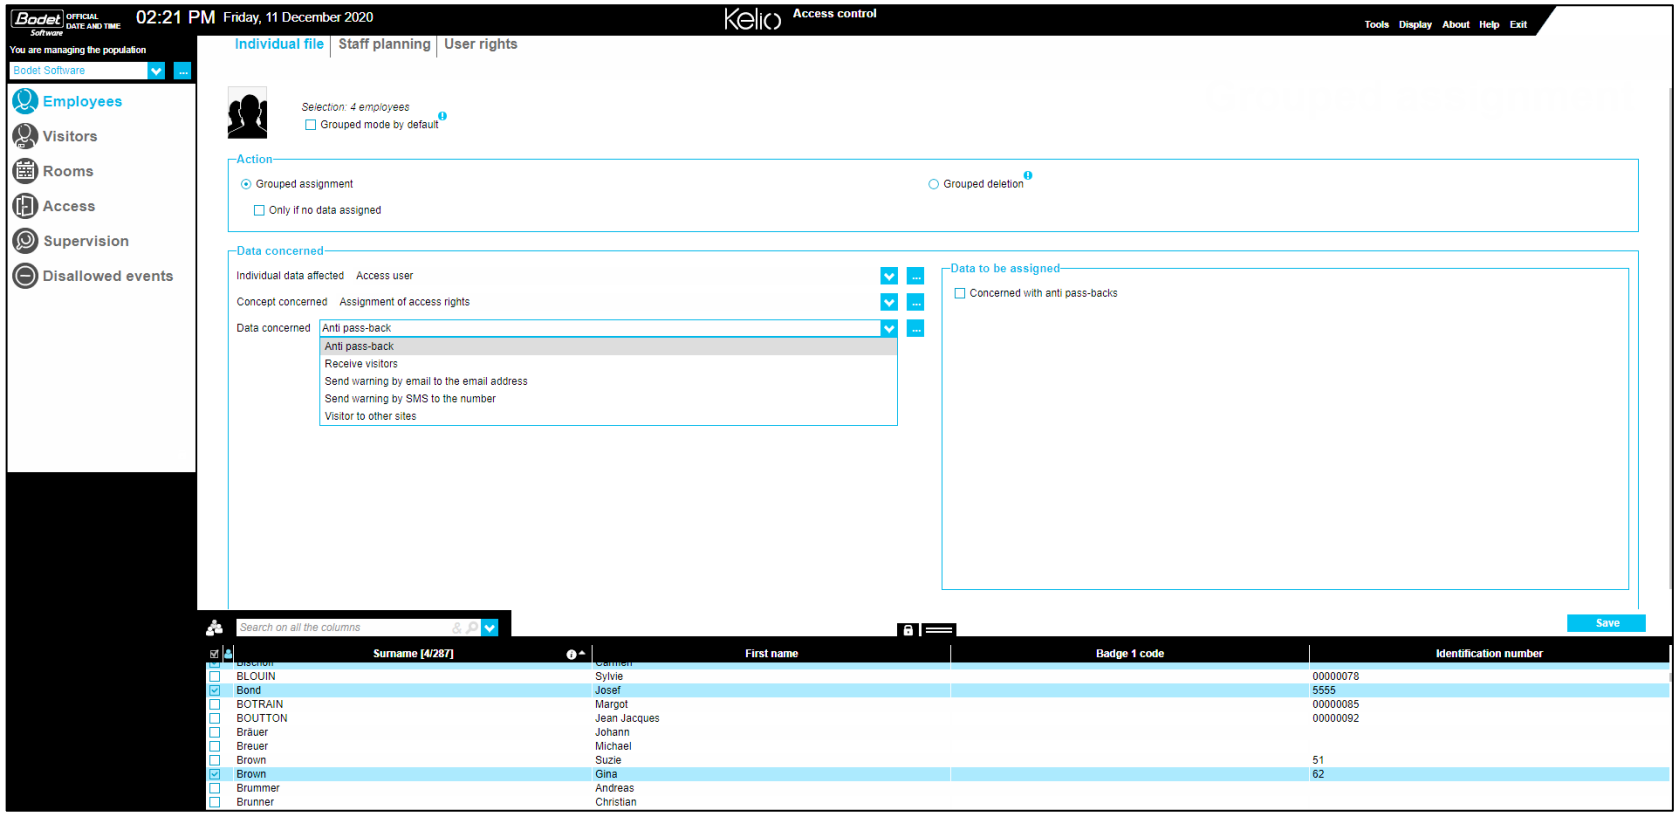
KELIO V4.3

1 NEW FEATURES SOFTWARE

ADMINISTRATION

Mass entry

To help you save time when entering data, Kelio offers a mass entry option.
This function is available for the following concepts: customisable fields, biometric user, service, access profile, etc.



VISITOR MANAGEMENT

Creation wizard for recurring visits

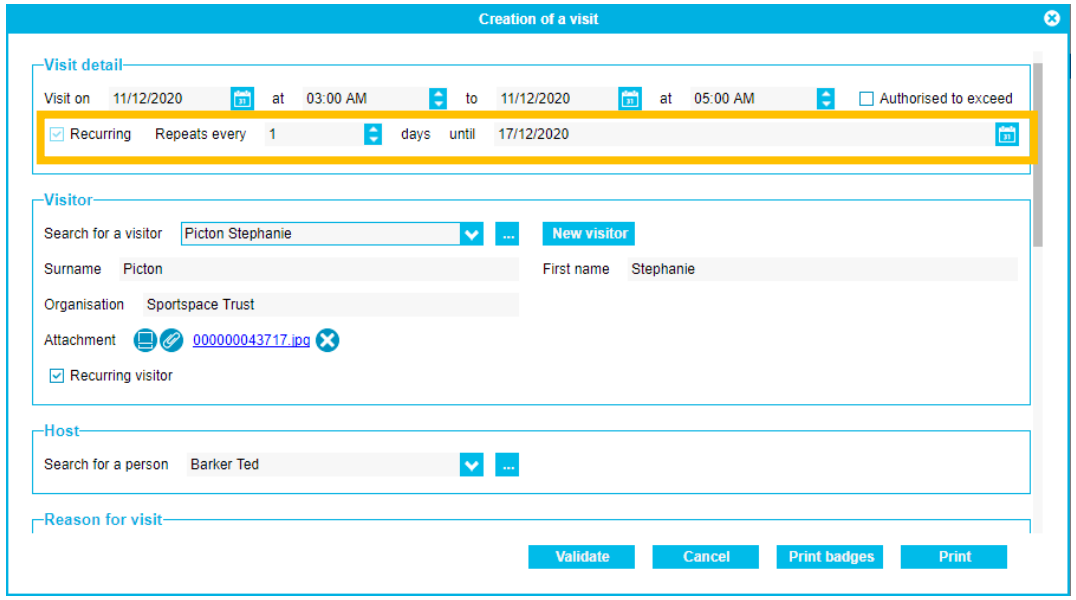
It's now easier than ever to manage your recurring visits if someone is going to be visiting for several days at a time, for example. If your visitor leaves earlier than the last scheduled day of their visit, you can also change a single occurrence in the series.

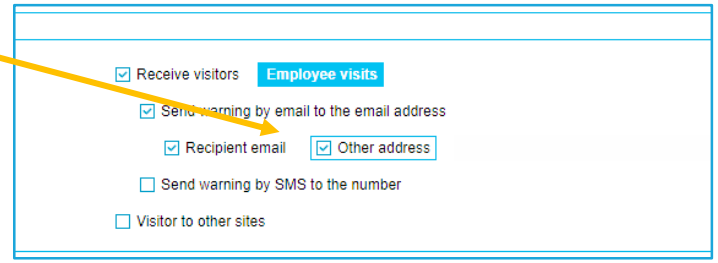
Host alerts

You can now notify the host and another person when the visitor arrives. This will enable an assistant to stay up to date in real time and attend to visitors while they wait, for example.

Attaching documents to visits

Make sure your visitors arrive safely at your premises and provide them with a map, instructions, etc. In our visit templates, you can attach two documents that could be useful for your visitor. You can also attach two other documents in the email reminder.





2 NEW FEATURES HARDWARE

ACCESS READERS

XTREM

- IP65/IK08
- Perfect for outdoor use
- OLED screen
- SFM6020 biometric reader
- MIFARE DESFire reader
- 12 V power supply
